

# LE NGUYEN DONG XUAN

Curious and motivated university student with a strong desire to learn and grow. Eager to take on new challenges, develop skills, and contribute meaningfully in any environment.

## Educational Background

### Bachelor, Software Engineer (Sep 2022 - Expected: August 2026)

University of Information Technology - Vietnam National University, Ho Chi Minh City (UIT-VNUHCM)

## Projects

*Aug 2024 - June 2025*

### Le-Gallerie (Social Media Website) (Personal Favorite)

**Role:** Full-stack Developer

**Overview:** Collaborated with a team of 2 to build Le-Gallerie, a social media platform for sharing visual content. Personally handled the majority of development tasks. The website is deployed on Vercel for seamless performance.

#### Key Responsibilities:

- Designed and developed a responsive, accessible UI
- Developed social interaction features such as likes, follows, and comments.
- Implemented image uploads with optimization using Firebase Storage and ImageKit.io.
- Integrated Firebase Firestore for real-time messaging and MongoDB for data storage.
- Implemented notifications powered by Knock for real-time updates.
- Integrated Pinecone Vector database for recommending system
- Developed admin interface for users management.

**Tech Stack:** Next.js, Pinecone, Gemini, Firebase, MongoDB, Knock, Auth.js, ImageKit.io

**Github repo:** <https://github.com/Xuana252/Le-Gallerie>

**Deployment:** Vercel ([le-gallerie.vercel.app](https://le-gallerie.vercel.app))

*April 2025 - June 2025*

### Electro Hive (Electronics E-Commerce System)

**Role:** Full-stack Developer

**Overview:** Co-developed Electro Hive, a web-based electronics e-commerce platform, as part of a two-person team.

#### Key Responsibilities:

- Designed and developed a responsive, accessible UI
- Built and integrated core e-commerce features: product catalog, search, shopping cart, and checkout.
- Developed backend services using Express.js, with REST APIs handling data flow between services and frontend.
- Integrated Socket.IO for real-time customer support chat functionality.
- Used Cloudinary for image upload, optimization, and content delivery.

**Tech Stack:** Next.js, Socket.IO, Cloudinary, Express.js, Auth.js

**Github repo:** <https://github.com/Xuana252/LapTrinhWeb>

**Deployment:** (Vercel - Render)

- Client:** <https://lap-trinh-web-nu.vercel.app>
- Store:** <https://lap-trinh-web-store.vercel.app>
